## SILVER CAMERA HEAD

Silver is Hybrid's small, light-weight and flexible PTZF (Pan, Tilt, Zoom, Focus) camera head.

Hybrid's robotic product line is focused on one commitment: Precision.

In fact, the technology it relies on is so precise that camera moves may be predicted and anticipated to produce the exclusive unique feature known as Zero Delay. With this feature, neither video or audio delay is required.

- All robots are controlled by the Cobalt panel, but may also be driven by the Mercury software graphic and user-friendly control interface.
- All robots are designed to provide perfect replicable motion, with variable adjustable speeds.
- All robot data can be exported for further 3D use (post-production, repeatable motion, etc.)

Set-up is easy. Once the physical studio is measured and the cameras positioned, the calibration process is straightforward and can be accomplished in minutes.

Simply aim the camera on a few targets in the studio, save the positions, and the virtual set is registered. Data communication is based on the reliable vehicle CAN protocol, which guarantees the overall precision and strength.

# KEY FEATURES

- Small size and light-weight
- Designed to be used everywhere
- Water-resistant
- Ceiling, wall or tripod mounting
- Low noise during movement

# TECHNICAL SPECIFICATIONS

- **Height:** 20 cm / 7.87 inches
- **Width:** 15.3 cm / 6.02 inches
- **Length:** 156.3 cm / 6.02 inches
- **Weight:** 8,4 kg / 18,5 lbs
- **Maximum payload:** 9 kg / 20 lbs
- **Pan range:** 340°
- **Maximum speed:** Pan/Tilt configurable up to 100°/sec
- **Minimum speed:** Pan/Tilt 0.01°/sec
- **Repeatability:** 0.02 arcmin/0.003°
- Lens zoom and focus drives
