

Haivision

# Haivision Play Series

High-Performance Software & Hardware Media Players

### Secure

AES 128/256 bit encryption ensures only intended viewers can watch streams.

### High Quality

Delivers pristine quality at low bitrates making it ideal for Internet or satellite transport of video.

### View Low-Latency SRT Streams

Haivision's highly efficient encoding and SRT video transport technologies assures quality-of-service when faced with packet loss, jitter, latency, and fluctuating bandwidth from unpredictable networks.

### Up To 4K UHD Resolution

Playback up to 4K UHD live and on-demand video on the Haivision Play 4000 Set-Top Box and the Haivision Play app (on 4K compatible devices).

### No Server Required

When used in standalone mode, no central server is necessary to play back compatible live video with most Haivision Play devices.\*

### Next-gen Compression

Playback HEVC (H.265) video for up to 50% bandwidth reduction compared to H.264 on most Haivision Play devices.\*

### Set-Top Box Management

Centrally control and schedule when and where your video is displayed - in hallways, public areas, conference rooms and auditoriums.

### Permission-Based Access

Support for Active Directory, LDAP and SSO ensures that viewing permissions can be set and enforced to control access to live streams and VOD content.

\*Does not include the Haivision Play 1000 Set-Top Box.

## Overview & Platforms

Haivision Play is a series of high-performance software and hardware media players that provide access to video streams, via the Haivision Media Platform for live and on-demand content or direct playback of live streams when used in standalone operation. A device specific Haivision Play software player is available as a free downloadable app for Apple iOS devices, Apple TV, and Android mobile devices. Haivision Play software comes pre-installed as the main application interface on the Haivision Play Set-Top Boxes.

### A Shared and Secure Viewing Experience Across All Platforms

Haivision Play provides a common viewing experience across different platforms. When used with the Haivision Media Platform's permission management, Haivision Play ensures that content is only delivered to authorized users. Haivision Play supports video encryption from source to screen in order to secure sensitive content.

### Versatile Use Across Multiple Locations

When used in standalone mode, Haivision Play for Mobile and the Haivision Play 2000/4000 Set-Top Boxes are directly tuned to video streams by the end user independently from the Haivision Media Platform.

When used with the Haivision Media Platform, Haivision Play Set-Top Boxes can be centrally managed across a multisite environment, allowing administrators to schedule live and VOD playback as well as changing channels and setting volume on one, some, or all Haivision Play Set-Top Boxes across an enterprise.

## Haivision Play solves many of today’s streaming challenges by delivering high performance video over the internet:

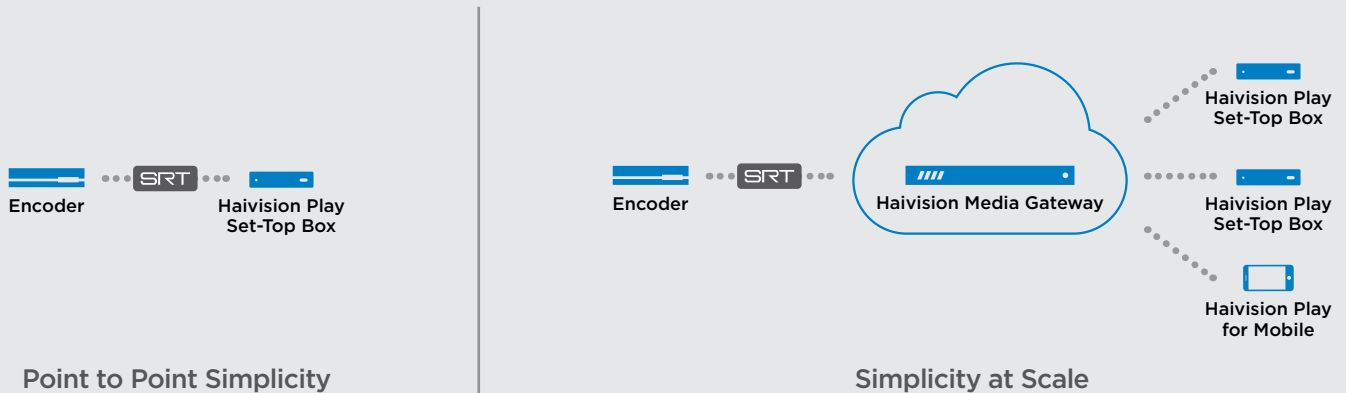

### Haivision Play Standalone Applications:

- Low latency return feeds enable field producers, talent, and technicians to coordinate with the broadcast center
- Remote real-time monitoring
- Low latency broadcast to remote facilities
- Standalone operation - no server required

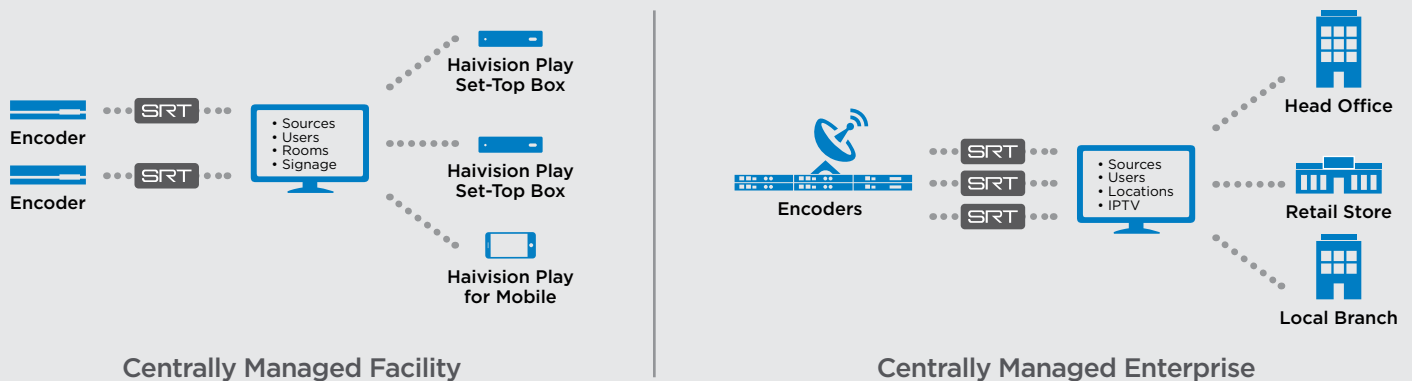

### Centrally Managed Haivision Play Applications:

- Viewing of live channels, lineups, and on-demand content on any screen anywhere
- User authentication with individual and group access control
- Centralized control of set-top boxes
- Multi-stream capabilities

**Haivision Play for Mobile**

In today’s fast paced business world, employees are often on-the-go. Haivision Play provides users with direct mobile access to SRT video streams or a Haivision Media Platform for live streaming events, IPTV channels and on-demand videos. Users have the flexibility to watch, contribute, and record directly from their mobile device, no matter where their work takes them. In addition, iOS users can upload content from their device’s personal library and download videos for offline viewing. Haivision Play for Mobile is available for free on the Apple App Store and Google Play.

**Haivision Play for Apple TV**

With Haivision Play for Apple TV, users have an easy-to-use and easy-to-deploy option for viewing live and on-demand video content from any TV or monitor within an organization. Haivision Play takes full advantage of Apple TV’s clean design, intuitive user interface and remote to enable easy search and browsing so users can access and watch authenticated, high quality content. The Haivision Play app for Apple TV is available for free on the Apple TV App store.

**FEATURES**

**BENEFITS**

<b>Secure, high quality HD video</b>	Enjoy the highest quality, lowest latency, HD video and audio
<b>Access to all HMP content</b>	Watch VOD content, live channels, multi-source sessions
<b>Authentication &amp; Permissions</b>	Authenticated, encrypted, and controlled access for all individuals and groups
<b>Flexible viewing options</b>	Side-by-side, picture-in-picture, and quad screen viewing options (depending on the platform)
<b>Powerful searchability</b>	Rich metadata capabilities including geotags with uploads and “HotMarks” allowing users to find specific videos or important moments in a given video
<b>Easy content contribution</b>	Users can upload videos from their own device library or stream live directly from their mobile device
<b>Accessibility</b>	IPTV support for North American 608/708 Closed Captioning and alternative language tracks
<b>Watermarking</b>	Protect confidential and copyrighted material with text-based watermarking

Haivision Play 1000 Set-Top Box

Haivision Play 2000 Set-Top Box

Haivision Play offers a series of high-performance video player applications that provide enterprise video users with the flexibility to watch their video content on any screen. Haivision Play is available for mobile devices, managed set-top boxes, and Apple TVs.

## High-quality, Secure HD Video

The Haivision Play Set-Top Box series delivers unsurpassed performance, quality, security and reliability for group viewing of live and on-demand content including webcasts, all-hands events, internal IPTV, research, training and any other video-based enterprise application. The Haivision Set-Top Box can access live SRT streams as well as managed content from the Haivision Media Platform.

**Pristine Video in HD & 4K** With support for 4K in stand-alone mode and full HD video through the Haivision Media Platform, the Haivision Play Set-Top Box series provides a pristine viewing experience for video-based business and research applications. Moreover, the Haivision Play Set-Top Box 4000 can natively upscale 1080p content to sharp 2160p resolution, providing your organization with video content on 4K displays for ensuring the most pristine quality video, on any connected TV, today and for the future.

**Central Control and Security** When connected to the Haivision Media Platform, all Haivision Play Set-Top Box units can be centrally controlled and easily managed by system administrators to schedule playback, switch channels, set volume, even put STBs to sleep over nights or weekends. Access to all content is protected with AES 128/256-bit encryption along with the Haivision Media Platform's conditional access permissions, ensuring the right people are seeing what they're supposed to.

**Easy Integration** The Haivision Play Set-Top Box series is easy to integrate with AV displays in custom-designed rooms of all kinds. All Haivision Play Set-Top Boxes ship with an IR remote control and wall power plug, while the Haivision Play 2000 & 4000 include even more integrator friendly features such as PoE+ (power over ethernet), 3.5mm IR extender and RS-232. Pre-built templates are readily available for use with Crestron and Harmony remotes to make custom room integrations simple. There is a Haivision Play Set-Top Box to meet all your enterprise deployment needs.

## FEATURES

## BENEFITS

Central Management	Controlled by administrators using the Haivision Media Platform
1080p High-definition Video Streaming	Display content at up to 1080p for a high-quality viewing experience, or use the Haivision Play 4000's internal upscaler for 4K displays
Authentication & Permissions	Authenticated, encrypted, and tailored access for all individuals and groups
AES 128/256-bit Encryption	Guarantees content protection
HDMI 2.0	HDMI out for easy setup of HD live TV playback
Remote Control	Local control via IR remote for channel selection and VOD playback
Network Friendly	Supports multicast and unicast
