

Workstations

>it's in our blood<

You: Artist, architect, animator, editor, engineer, producer, director, modeler, designer, composer, game developer, visual effects supervisor, superhero.

YOUR TOOLS: 3ds max, Maya, Softimage, LightWave 3D, Adobe Premiere Pro, After Effects, Photoshop, combustion or other DCC applications that fuel creativity.

YOUR WORKSTATION: BOXX delivers rock-solid, production-proven workstations with the power and flexibility you need to create complex, multidimensional projects in a variety of formats—from 2D and 3D to DV, SD and HD.

You have enough to worry about—inflexible deadlines, changing storyboards and demanding clients, to name a few. The last thing you need to worry about is your hardware. BOXX's in-house technical support team is made up of skilled professionals that specialize in the products you use—combustion, Adobe Premiere Pro, 3ds max, Maya, Softimage, LightWave 3D and many others. By specializing in digital content creation software, our technical team can quickly pinpoint and troubleshoot problems to minimize downtime and keep your project on schedule.

So, whether you're modeling 3D characters in your spare time, the lead animator for the next big all CG movie, or compositing and editing for broadcast or film, BOXX delivers fast, flexible built-to-order workstations that are exactly what you need.

THREE WORKSTATION DESIGNS OFFER GREATER FLEXIBILITY TO MEET YOUR INDIVIDUAL NEEDS

6-Bay Workstations

Perfect for animation, architecture or any multi-application user who needs a powerful system for compute-intensive tasks. These models incorporate six internal hard-drive bays and two available external 5.25" bays.

8-Bay Workstations

Designed for the multi-application user requiring enhanced flexibility and greater storage expansion, these workstations are ideal for editing DV, SD or applications that need large amounts of internal storage. This workstation series incorporates eight internal hard-drive bays and four available external 5.25" bays.

12-Bay Workstations

Ideal for anyone working with high-definition footage or software programs that require a maximum amount of internal storage and system flexibility, these workstations incorporate 12 internal hard-drive bays and two available external 5.25" bays.

Every BOXX workstation is available with Intel or AMD processors and features a removable and washable air-intake filter, tool-less case entry and hard drive removal, shock-isolated hard-drive mounts and additional fans for increased air flow and maximum system performance.
